New and unique design creations made entirely by hand, by skilled Italian craftsmen and designed with an artist touch.

Interchangeable modular units that give the client the flexibility to change it up from time to time. Coffee tables made of iron with gold leaf, corten and Plexiglas. Luxurious arm chairs for indoor and outdoor made out of corten and steel. Never before seen chairs, like handmade sculptures made out of iron sheets, interpreted in unique and ironic ways. Dining tables made of opposing materials, wrought iron and crystal. Floor lamps with an artistic design for unique pieces. Mannequins that act as floor lamps, whose light shines from an iron crown, finished in gold. All around these incredible design creations, is also a nod to fashion: jackets hand made and hand painted... a very unique world to discover...Francesca Levi World
